

PERFORMANCE DRIVEN BY THE RIGHT AMOUNT OF PRESSURE

With over 90 years of experience, we have become true specialists in fuel injection technology.

➔ Testing and Overhaul of Injection Pumps and Nozzles:

Wulf Johanssen offers professional testing and refurbishment of injection pumps (inline and unit pumps) and injection nozzles for marine engines, railway engines, and stationary systems from leading manufacturers. A state-of-the-art, Bosch-certified test bench with a performance range of 15 to 38kW is available for diagnostics and repair.

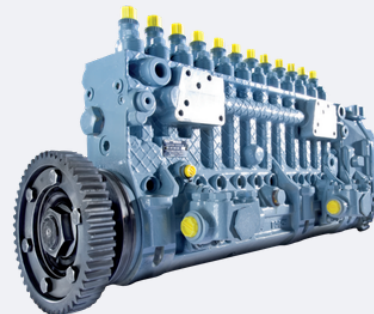

➔ Our Standard Overhaul Services:

The injection pump is disassembled and overhauled using either genuine or RECON® components. Professional diagnostics are carried out prior to both full and partial overhauls. During a complete overhaul, all sealing elements are generally replaced as standard.

- On-site removal and installation of the injection pump
- Leak testing, inspection, and adjustment of injectors
- Replacement of injector nozzles
- Testing of injection pumps
- Sealing and/or overhaul of injection pumps
- Documentation of the overhaul (test reports, photos)
- Testing in accordance with manufacturer specifications
- Calibration of the injection pump on Bosch-certified test benches
- Engine-specific fine-tuning according to customer requirements

Overhaul of pumps from leading manufacturers, including:

- Bosch
- Caterpillar
- Cummins
- DEUTZ
- Everllence
- L'Orange
- MaK
- MAN
- Mitsubishi
- MTU
- MWM
- Scania
- Wärtsilä
- Woodward
- etc.

Optional:

- Conversion to electronic governors (e.g. GAC, Heinzmann)
- Alternatively – Replacement of injector holder
- Alternatively – Replacement of injection pump

➔ Spare Parts Service & New Pumps:

We coordinate the procurement and supply of maintenance kits and spare parts for your injection pump. We are also happy to deliver and install new or reconditioned injection pumps. Don't hesitate to get in touch with us!
